May produce an allergic reaction.

Floor Cleaner

Features

- **Easy in use and highly effective**

- **Protects your floor's beautiful original character**

With Pergo maintenance products you avoid build-up of layers of cleaning product from previous cleaning sessions. Also dirt and unhygienic residues are removed at a glance.

- **Developed for Pergo floors**

Specifically developed for and tested on Pergo floors, so you can be sure you are giving your floor the right maintenance. You safeguard your floor's guarantee by using Pergo maintenance products.

- **A heart for your home and our planet**

Pergo Floor cleaner offers both an effective as well as mindful solution for maintaining your floor.

- Biodegradable product
- Bottle made from 100% recycled plastic
- Produced in a carbon neutral factory

Floor Cleaner

Maintenance

Once or twice per month, depending on how often the floor is used and how dirty it gets, we advise a thorough cleaning session with a slightly damp microfibre mop. Be careful not to use too much water: it is unnecessary and could damage your floor.

1. Vacuum or mop your floor thoroughly to make sure you got rid of all the dust. Make sure your vacuum cleaner is equipped with soft wheels and a special parquet brush.
2. **Residential cleaning:** Fill a bucket of 10 litre with water and 2 capfuls of Pergo Floor cleaner and another bucket with clean water for rinsing out your mop.
Intensive cleaning of persistent dirty floors: Fill a bucket of 10 litre with water and 6 capfuls of Pergo Floor cleaner and another bucket with clean water for rinsing out your mop.
3. Wipe the floor with a slightly damp Pergo microfibre cloth, which has been dipped in the bucket with diluted Floor cleaner. Regularly rinse and wring out, avoid using excessive water.
4. Rinse your mop in the bucket containing clean water and wring it out well. After that, wipe your floor again and let your floor airdry*.
* For floors without AquaSafe technology: wipe your floor again until it's entirely dry.
